

RONIN SEMINARS

Ronin Dog Training seminars and classes are for Police or Military working dogs. All the training methodologies are biased towards getting the dogs ready for real work and are not sport orientated.

The Unique vision of Ronin is that we don't only show you how but also why.

Decoying for Police and Military dogs

Good Decoys are a vital investment for the K9 units.

The selection of good dual purpose dogs for your program depends a great deal on someone who can read and feel the dog during the test.

The information given by the dog during test says everything about if the dog is just showing "trained behavior" or if it's in the genes.

Also if the dog has already had prior training and how well (or bad) its done.

This information and then a good buildup aggression program results in a solid street dog that does the work to the full capacity of that dog.

This prevents a false feel of safety by the K9 officer and his fellow officers which happens very often with pure prey-build aggression training.

A solid street K9 is essential for a K9-officer's safety.

Decoying for Police and Military dogs is a very misunderstood discipline.

Too often the dogs are trained in the wrong drive on the wrong time resulting in dogs not ready for the street.

To be a decoy for your unit or department is not about only "catching dogs" or being the "guy in the suit" and for sure it's not about trying to look scary or though.

It's about reading the dog in which drive he or she is ,change it if needed and train towards the goal, creating balanced fighting dogs for your unit.

IT'S THE DECOY WHO TRAINS THE DOGS IN PROFESIONAL BITEWORK.

HE EITHER BREAKES OR MAKES THE DOG.

Because a decoy must have a very good knowledge on what is happening in the dogs head and he must have a very good understanding of how a dog learns the decoy classes go in on full depth in dog training.

The Professional Decoy Class

There are 3 Levels in Professional Decoying.

After each class you reach a level.

Level 1
